

Understanding the Whole of County Government – 3 hours CEU

The mission of this 3-hour Continuing Education Unit is to review the primary functions of county government and the duties and responsibilities of elected and non-elected officials in carrying out those functions. Participants gain a better understanding of the roles of all of the county departments and how those departments interact with each other as a team in providing services to the public. This basic understanding is the key to blending the Constitutional and Statutory requirements and the expectations of county government departments, programs and services.
